

# BioChar Integration Opportunities

**Jan** .....

Gather BioChar feedstock by Coppicing or cutting back trees.

**Feb** .....

Integrate BioChar early while digging in your Green Manures

**Mar** .....

Prune your Winter Flowering shrubs for more feedstock.

Mix BioChar into your compost, or tuck it under your mulch.

**Apr** .....

Roses & Dogwood also make good BioChar!

Get BioChar in deep when planting early potatoes.

**May** .....

Build yourself a drying store for garden cuttings to prepare for charring.

Appreciate nature, sow and harvest.

Attend Preta Carbon's events using their calendar.

**Jun** .....

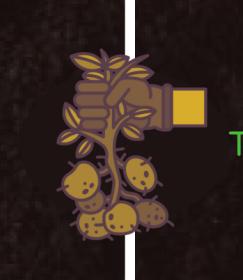

Prune Spring bloomers and stone fruit trees for additional biomass.

**Jul** .....

Cleared any beds? Get a mulch on, with a layer of BioChar.

**Aug** .....

Relish the fruits of your labour, then join Preta Carbon at an event near you.

**Sep** .....

Digging up Potatoes? This is an opportunity to get BioChar in deep.

**Oct** .....

Time to trim the Perennials, save the cuttings for your BioChar maker.

**Nov** .....

Prune the last of your fruit bushes for feedstock.

Start to bed down with mulch and biochar.

**Dec** .....

Cozy up with your Preta Carbon BioChar stove.
